La terracotta smaltata viene cotta ad una temperatura che riduce al minimo l'umidità all'interno del vaso che, in caso di freddo, gela e lo può rompere. Eventuali variazioni di colore dipendono dalla lavorazione artigianale e dalla temperatura dei forni a legna. Sono vasi garantiti per il gelo, ma bisogna prevedere sempre un corretto drenaggio all'interno per fare defluire l'acqua in eccesso.

The glazed terracotta is fired at a temperature that minimizes the humidity inside the vase which, in case of cold, freezes and can break it. Any color variations depend on the craftsmanship and the temperature of the wood-fired ovens. They are guaranteed frost-proof pots, but proper drainage must always be provided inside to allow excess water to drain away.

Il fyber glass è una miscela di materiali in fibra di vetro, sabbia silicea (che nasce dall'erosione del letto dei fiumi fortemente drenante) e concrete/cement. I vantaggi di questo materiale sono la durabilità, la resistenza agli effetti atmosferici uniti alla leggerezza, fattore molto importante soprattutto per le misure medio/grandi. La nuova Collezione Bizzotto propone una gamma di articoli dal design moderno ed attuale.

Fyber glass is a mixture of fibreglass, silica sand (which arises from the erosion of highly draining river beds) and concrete/cement materials. The advantages of this material are durability, resistance to atmospheric effects combined with lightness, a very important factor especially for medium/large sizes. The new Bizzotto Collection offers a range of items with a modern and current design.

La magnesia è un materiale naturale, come la terracotta, ricco di magnesio e rinomato per la sua resistenza agli agenti atmosferici e alle intemperie. I portavasi e le decorazioni in magnesia possono quindi resistere agli agenti atmosferici mantenendo la loro bellezza ed effetto materico nel tempo.

Magnesia is a natural material, like terracotta, rich in magnesium and renowned for its resistance to atmospheric agents and bad weather. The magnesia vase holders and decorations can therefore resist atmospheric agents while maintaining their beauty and material effect over time.
