KARE
DESIGN

LET'S DO BETTER.

the **KARE** Sustainability Initiative.

Just as the passion for design and living is part of our heritage so is the sense of responsibility for social, cultural, ecological and economic sustainability. While our goal is ambitious, we're making steps every day to improve in each area.

Therefore we have launched the initiative „Let's do better“. With it, we are pulling out all the stops to further ensure sustainability in all areas of the company.

Everything starts with the design idea

Every step counts when it comes to sustainability, and we already took the first step in the 1990s. Instead of mass production, we focus on small furniture series, which we produce in workshops and manufactories from high quality materials. We know our suppliers personally and inspect each production location throughout Europe and Asia several times a year. Humane and fair working conditions are a must if we are to choose a business partner.

Thinking big

Doing it better than others - with this idea, the company **KARE** started in 1981. Our mission is to provide every home with furniture of lasting value, to make every home a happy place. The term „home“ is associated with much more than just your own four walls. The environment and nature, the people with whom we live and work with, and our social environment are part of it. Our mission does not end at the doorstep of our customers' doors or in front of our premises.

„We do not create disposable products. Our mission is creating furniture favorites that have what it takes for lifetime friendships.“

Peter Schönhofen

Preserving values Conserving resources

Our products are primarily manufactured with high-quality, solid, recycled or recyclable materials. For example, our solid wood dining tables can be sanded down and resealed. Sideboards made from recycled wood are both timeless and unique, and will find its place as a favorite piece or later gifted a second life as a vintage treasure.

Wood with origin

Each manufacturer must provide us with information on the origin of the wood and other natural materials as well as submit current, recognized certificates for legal and ecologically compatible procurement. **KARE** wood products originate exclusively from legal forestry. This control process creates trust and makes a valuable contribution to the future of us all.

A good feeling of living

Natural materials such as real wood, marble, cotton, wool and linen are becoming more and more components in our collections. Because with their colors, their haptics and their stories, they convey a wonderful living feeling, do not pollute our environment, and when recycled, they can be reused in the material cycle again.

“With the support of workshops and manufactories, we save rare handicrafts from extinction. And we give local family businesses a future and thus strengthen the social community there.”

Jürgen Reiter

Leather for life

A beautiful real leather sofa is an investment for a lifetime - with good maintenance, it is resilient and it becomes increasingly beautiful over the years. Real leather is naturally resistant to abrasion, resistant and tear resistant. Especially in comparison to cheap leather alternatives, high-quality leather is more environmentally friendly when it comes to production.

Sustainable thinking

On a sideboard made of recycled wood, for example, carpenters often work many days. Furniture is not only made up of natural materials, such as wood, worthy of protection, but often also the knowledge of centuries-old craftsmanship traditions. That is why we create furniture, that will accompany our customers as loyal friends for a lifetime. Because in this way, too, we all make a contribution to sustainable action.

Quality put to the test

KARE stands for creative that is full of passion. And yet it is bureaucracy, that ensures the careful handling of nature and its fascinating materials. Our Quality Management department inspects every product in accordance with the strict European regulations. In this way, our team ensures that with the procurement of wood we contribute to the preservation of nature. Even paints, varnishes and e.g. coatings are strictly regulated.

Here's to a long friendship

KARE stands for boundless inspiration! That is why we offer furniture, lighting and decoration for every taste and style. After all, living should be fun. However, furniture is not a disposable item in our eyes.

KARE CEO Peter Schönhofen: „They are part of our home, indeed perhaps even part of the family, and they represent a value. We want to preserve that.“

Natural to the touch

Our home textiles have a good feel to them. They are crafted from natural materials such as cotton, linen, or near-natural resources such as viscose, which is based on plant fibers. Our internal quality management controls the certificates of origin and manages the usage of certified labels such as **FSC** and **OEKO-Tex 100**.
